CEO Message

In our ever-growing world, everything that we experience has become more and more advanced. Technology posits a greater challenge to meet the demands of time.

This is the truth in the United Arab Emirates. Our society has embraced technology and all its advancements as part of our daily lives. It is inescapable as it is prevalent. It improved our daily lives. Now, the challenge is how can these developments be sustainable?

This is where the core of Al Hadaf is born. We innovate solutions that creatively marry sustainability and technology. We offer services that improve human lives without setting aside its societal and environmental impacts.

It is a win-win situation.

Because you deserve no less.

"Train people well enough so they can leave, treat them well enough so they don't want to."

- Engr. Ibrahim Alqudah

//
**We Make Your Business
More Creative**

ABOUT COMPANY

Al Hadaf Al Daqeeq Contracting & General Maintenance LLC is a trailblazer in the field of engineering and technology. As a leader in the construction industry, we innovate solutions that are especially designed for your needs.

We take pride in offering only the best services including Community/Municipal Contracts, K-Span Building System, Industrial Projects Residential/Commercial Developments, Renovations and Maintenance Works, Turnkey Projects, Erection of Steel Structures, and Fireproofing Protection. Our service was originally launched in Abu Dhabi and

other cities in U.A.E. with a foresight to gradually grow to take a global position in the construction market. Within more than a decade of growing in line of work and developing our expertise, we have served hundreds of clients for projects in Abu Dhabi City and western Area, like Al Ain, Dubai, other cities and GCC region to the full satisfaction of our customers.

Through our long history of successful projects, we have accepted and developed experts in the field of engineering technology and construction that transform technical knowledge into quality results.

Value of Our Company

Vision

We strive to be the premier engineering, construction, and project management company in U.A.E. through attainment of exceptional solutions for our customers, building satisfying careers for our people, and earning fair interest on the service we deliver.

Mission

To achieve for our customers incomparable quality construction services at reasonable cost.

To ensure the sustainability of our company by establishing long term relationships with our clients based on safety, quality, timely service and an anticipation of their needs.

To maintain the highest levels of professionalism, integrity, honesty and fairness in our relationships with our suppliers, subcontractors, professional associates and customers.

AL HADAF CONSTRUCTIONS SERVICES

We take pride in being a highly experienced construction contractor. Our services include preconstruction, construction and project management, and general contracting. We offer services that are tailor-fit to your needs.

We offer an array of projects, products and services that are backed by a professional team, including:

1. Community/Municipal Contracts
2. Industrial Projects Residential / Commercial Developments
3. Renovations and Maintenance Works
4. K-Span Building System
5. Turnkey Projects
6. Erection of Steel Structures
7. Fireproofing Protection

Industrial Projects Residential Commercial Development

Our industrial development project ranges from residential and commercial fields. We offer construction of different buildings depending on the client's need. Our versatile strategy enables us to plan and execute industrial projects.

Renovation and Maintenance Works

We have highly qualified and skilled teams who are able to undertake just about every aspect of the construction phase. Al Hadaf directly employs teams of bricklayers, joiners, plumbers, tilers, plasterers, painters, among others. We also have excellent sub-contractors that supply electrical, landscaping and decorating services.

Whether you want a building contractor / maintenance team urgently to repair a damaged structure or are planning to renovate your existing structure or home - we have qualified people to do the job for you!

TURNKEY PROJECTS

We develop systems that are built end-to-end for a client that can easily be transformed into a direct business process.

K-SPAN BUILDING SYSTEM

The **Ultimate Building Machine** is an all-terrain locomotive factory that manufacture heavy-duty steel buildings in days rather than weeks or months.

This **ultra-modern technology** uses an integrated microprocessor to create structures unlike anything else from varied designs with self-supporting panels.

Increase building efficiency with **its cellulose and urethane insulation systems**. Once insulated UBM buildings can be air-conditioned and heated by conventional heating systems, with superior acoustic control and stunning finish.

The UBM meets the highest safety standards including European CE compliance.

ADVANTAGES OF THE UBM

Rapid Construction

The expeditious construction and the particular operation of seaming panels allow a crew of 10-12 workers to erect a building in as little as one day. Construction time is expedited because UBM steel buildings need no screws, bolts, fasteners, beams, trusses or columns, which means.

Cost-Effective

This state-of-the-art technology simplifies construction and reduce operating cost by limiting the manpower to a handful of crews. With UBM, the whole process of construction can be done in as little as one day - economizing time and money!

WHY CHOOSE UBS LIGHT GAUGE BUILDING SYSTEM

- Cost Effective and Quick to Build
- Dimensionally Stable
- Durable and Safe
- Environmentally Friendly
- Fire Resistant
- High Strength to Weight Ratio
- Reduce Cost of Foundation or Earth Works
- Strong and Design-Flexible
- 100% Recyclable

Flexible Designs

The UBM allows us to build structures according to your individual requirements. It starts with the choice of building design, shape and size. Building dimensions and the capacity to later expand are limitless. Different steel colors can be used in UBM to enhance the appearance of your buildings.

Durable and Low Maintenance

The UBM buildings are long-lasting, practically maintenance-free because they are water-resistant, rust-free, and fireproof and have been proven to withstand severe weather conditions such as typhoons, strong winds and earthquakes.

Polyurethane Foam Spray

This coating produces a weather resistant surface that can be walked upon for normal maintenance. It could be applied in different densities and thicknesses depending on the project requirements

Polyurethane foam is produced by a chemical reaction of a polyol and an isocyanate, in the presence of catalysts and other additives.

ERECTION OF STEEL STRUCTURE

We specialize in the erection and design of steel structures that surpass our clients' expectations.

AL HADAF offers high-quality, efficient and cost-effective erection and design service for all projects with guaranteed safety.

The erection of structural steelwork consists of the assembly of steel components into a frame on site. The processes involve lifting and placing components into position, then connecting them together. The assembled frame needs to be aligned before bolting up is completed, and the structure is handed over to the client.

Often the ability to complete these processes safely, quickly and economically is influenced significantly by early decisions made during the design process, long before erection commences. It is important that designers clearly understand the impact that their decisions can have. With this, our expert CAD design and analyst give their expert opinion on the design for construction.

Good site coordination facilitates a smooth-running project. Adequate access is required by the steelwork contractor for steel transportation, unloading and erection - both on the site as well as on surrounding or adjacent access roads. The provision of well-prepared level ground that is able to take the requisite wheel loads is essential. Use of the best security policy standards will assist in meeting these requirements, thus reducing the risk of accidents and delays due to poor and unsafe site conditions.

Steel Structure Building is used in:

1. Industrial
2. Commercial
3. Agricultural Environment
4. Government Building Structure

Fireproofing Painting Works

Using **INTUMESCENT PAINT** for steel protects the steel substrate by providing an insulating layer between the steel and the fire. Exposure to the heat of a fire triggers a reaction, causing the intumescent paint to expand to up to 50 times its thickness and form a solid foam-like char. This char insulates the steel from the heat, keeping it below the temperatures that might compromise it. Intumescent paint for steel is the main fire protection paint for steel as it provides protection from heat as well as flame.

Intumescent coatings are a great solution when aesthetics come into play. The product is applied just like paint, with every layer adding to the overall thickness of the product. This fireproofing material can be applied to structural wood as well.

Using **CEMENTITIOUS PAINT** for fire protection is normally applied using specialist equipment to protect structural steel or concrete from the effects of fire for nominal fire resistance period. Gypsum based sprays are sometimes considered as Cementitious and may be used internally. The gypsum-based fireproofing cementitious paint has excellent physical properties for interior/architectural uses and cementitious paint can give up to 3 hours fire protection.

Intumescent Paint is used in:

1. High rise construction
2. Manufacturing facilities
3. School
4. Hospital
5. Sport facilities
